What is Cloud Financial Management (FinOps)?

A cultural practice that enables organizations to get maximum business value by helping engineering, finance, technology, and business teams to collaborate on datadriven spending decisions.

Managing access to on-demand resources.

Forecasting the cost associated with variable usage.

Understanding cloud pricing options.

Increasing awareness of resource costs.

Selecting optimal services and resource types/sizes.

Governing cost in a continuous manner.

Five modules to outline capabilities ...

Cloud Visibility & Accountability

Cloud Cost Optimisation

Cloud **Financial** Predictability

Cloud **Financial** Operations

Cloud Performance **Indicators**

What will the Cloud

cost my

organisation?

overpaying for

Cloud services?

How can I see what and when we spend on the Cloud?

Cloud bill?

How can I avoid How do I split the

Establish Drive Efficiency Ownership

How do I forecast my Cloud spend?

How do I avoid 'Bill Shock'?

Set Expectations

Who should do what in my organisation?

How do I put some order here?

Define Rules

Should I worry if my Cloud bill keeps growing month after month?

How do I measure success (KPIs)?

Measure CFM Progress and Business Success

... for establishing a collaborative process ...

Establish Ownership

Which accounts / resources / shared costs belong to a user / business unit / customer

Define Rules

How often FinOps / Finance / Tech will meet and for what purpose

What type of resources are tech teams allowed to use

How do we purchase and use commitment-based discounts

What if a user goes over budget

Set Expectations

How much cost is a user / business unit / customer expected to generate next month

How do we keep track of these expected costs

Measure CFM Progress and Business Success

How much of our bill has a defined owner

How well are we covered with commitment-based discounts

How is our cost per transaction tracking

Drive Efficiency

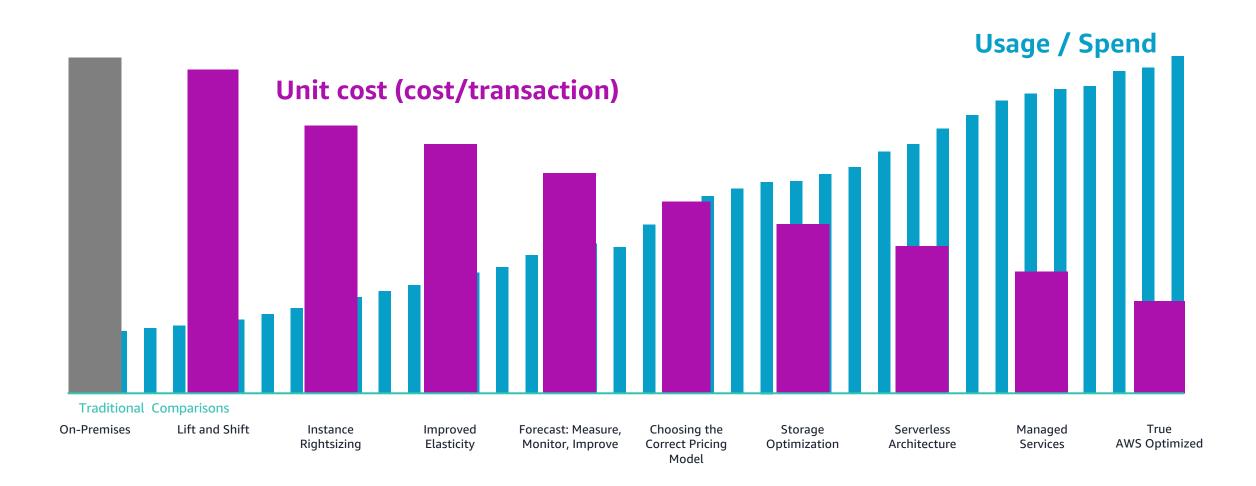

What resources can be rightsized

Can we track demand more closely and reduce waste

Can we increase our commitments to improve our rates

... and to drive business success

aws Agenda

Every Module: 'Where to start?' section

Customer's degree of maturity

- ✓ Crawl stage
- ✓ Low hanging fruit opportunities
- Removing the chaos and overwhelming
- ✓ Start your journey here!

- ✓ Walk stage
- Acceleration opportunities
- Ownership of Cloud Financial Management
- The most important step!

- ✓ Run stage
- ✓ Going the extra mile
- Automation and advanced CFM practices
- An ideal scenario (or at least an inspiration to build upon)

Every Module: 'Who is responsible for what?' section

✓ Use the reporting provided by FinOps team for cost allocation and forecasting, as well as sourcing, purchasing, and monitoring of products and services within the Cloud provider

FinOps Persona

- Bridge finance and tech (IT) by enabling evidence-based decisions in near-real time to help optimize cloud use and increase business value.
- Establish FinOps culture and enable all stakeholder teams.

- ✓ Focus on building and supporting services for the organization
- Consider efficient design and use of cloud resources (cost is a metric)

Every Module: There are always different approaches

Do-It-Yourself

(basic self-service)

Automated

(using your AWS environment)

Assisted

(with AWS Partners)

DIY

Taking initial steps / **Exploring options**

Spectrum of customer involvement

Working with a third-party / Automating the process
